

Table S13. We found no evidence for time-lag effects, where initially strong results decline through time. Table includes test statistics and model estimates $\pm$ 95% CIs for the intercept and publication year.

term	Estimate	Test statistics
Abundance before-after eradication		
Intercept	-0.06 $\pm$ [-9.5, 9.38]	$t_{1,1} = -0.09, p = 0.95$
Publication year	1.56 $\pm$ [-8.82, 11.93]	$t_{1,1} = 1.91, p = 0.31$
Abundance on islands with/without cats		
Intercept	-0.12 $\pm$ [-1.79, 1.54]	$t_{5,5} = -0.19, p = 0.86$
Publication year	0.01 $\pm$ [-1.42, 1.45]	$t_{5,5} = 0.03, p = 0.98$
Abundance spatial association		
Intercept	1.11 $\pm$ [-1.01, 3.23]	$t_{2,2} = 2.25, p = 0.15$
Publication year	-2.67 $\pm$ [-7.03, 1.7]	$t_{2,2} = -2.63, p = 0.12$
Abundance temporal association		
Intercept	-0.56 $\pm$ [-1.52, 0.41]	$t_{9,9} = -1.31, p = 0.22$
Publication year	0.89 $\pm$ [-0.32, 2.09]	$t_{9,9} = 1.67, p = 0.13$
Abundance with/without cats		
Intercept	-0.45 $\pm$ [-1.22, 0.32]	$t_{8,8} = -1.35, p = 0.22$
Publication year	-0.02 $\pm$ [-0.71, 0.66]	$t_{8,8} = -0.07, p = 0.94$
Reproduction before-after eradication		
Intercept	0.39 $\pm$ [-1.5, 2.27]	$t_{1,1} = 2.61, p = 0.23$
Publication year	-0.95 $\pm$ [-7.8, 5.89]	$t_{1,1} = -1.77, p = 0.33$
Reproduction with/without cats		
Intercept	-0.26 $\pm$ [-12.56, 12.03]	$t_{1,1} = -0.27, p = 0.83$
Publication year	0.34 $\pm$ [-10.4, 11.09]	$t_{1,1} = 0.41, p = 0.75$
