

Table S15. We found no evidence for time-lag effects, where initially strong results decline through time. Table includes test statistics and model estimates $\pm$ 95% CIs for the intercept and publication year.

term	Estimate	Test statistics
Abundance before-after eradication		
Intercept	-0.12 $\pm$ [-9.55, 9.31]	$t_{1,1} = -0.16, p = 0.9$
Publication year	1.08 $\pm$ [-8.81, 10.97]	$t_{1,1} = 1.39, p = 0.4$
Abundance on islands with/without cats		
Intercept	-0.12 $\pm$ [-1.79, 1.54]	$t_{5,5} = -0.19, p = 0.86$
Publication year	0.01 $\pm$ [-1.42, 1.45]	$t_{5,5} = 0.03, p = 0.98$
Abundance spatial association		
Intercept	1.11 $\pm$ [-1.01, 3.23]	$t_{2,2} = 2.25, p = 0.15$
Publication year	-2.67 $\pm$ [-7.03, 1.7]	$t_{2,2} = -2.63, p = 0.12$
Abundance temporal association		
Intercept	-0.56 $\pm$ [-1.52, 0.41]	$t_{9,9} = -1.31, p = 0.22$
Publication year	0.89 $\pm$ [-0.32, 2.09]	$t_{9,9} = 1.67, p = 0.13$
Abundance with/without cats		
Intercept	-0.43 $\pm$ [-1.14, 0.27]	$t_{8,8} = -1.41, p = 0.2$
Publication year	-0.07 $\pm$ [-0.7, 0.57]	$t_{8,8} = -0.25, p = 0.81$
Reproduction before-after eradication		
Intercept	0.38 $\pm$ [-1.5, 2.27]	$t_{1,1} = 2.58, p = 0.24$
Publication year	-0.98 $\pm$ [-7.84, 5.88]	$t_{1,1} = -1.82, p = 0.32$
Reproduction with/without cats		
Intercept	-0.3 $\pm$ [-12.89, 12.29]	$t_{1,1} = -0.31, p = 0.81$
Publication year	0.32 $\pm$ [-10.67, 11.31]	$t_{1,1} = 0.37, p = 0.77$
